*Gross payload capacity equals GVWR minus chassis weight. Installation of specialized equipment or bodies may require frame reinforcement. **Wheelbase selection should be based on specific weight distribution. ***Typical body lengths assume water level load (no specific consideration for driver, passengers, or fuel) to maximize GVWR. Addition of ancillary equipment such as lift gates and refrigeration units not considered in calculations.

MD-175* 16 valve

ENGINE

	Turbo/Intercooled Diesel
	In-line 4 cylinder, Direct-injection
Horsepower	175 hp @ 2,500 rpm
Torque	376 lb. ft. @ 1,600 rpm
Displacement	289 in. ³ (4.728 L)
Cylinder Liner	Dry, replaceable
Fuel System	Electronically controlled, commonrail system
Air Cleaner	11.0 in., dry type
Cold Starting Aid	Automatic electric glow plug
Fan	Viscous type drive

*MD-175 (J05D-TF) is a vendor engine manufactured for Nissan Diesel Motor Company
